

Magellan Rx Management Portal Enhancements

The web portal has had several significant upgrades to its features, functionality, and design. These enhancements include more feature-rich functionality along with a mobile and tablet friendly design. These upgrades include –

- 1. Rich User Experience and Responsive Design**
The user interface has been remodeled to use Responsive Design. This allows end-users to access the site from any form factor – desktop, tablet or mobile device without losing any functionality.
- 2. Dashboard**
The Dashboard provides quick access to the most frequently used portal elements featuring snapshot views of the members most recent Claims, frequently used forms, and Find a Pharmacy.
- 3. Streamlined Price a Drug**
Price a Drug has been streamlined and enhanced – you can now price drugs from 3 pharmacies simultaneously, select drugs from your claims history, and set a default pharmacy to be able to automatically price drugs against your most frequently used pharmacy.
- 4. Account Settings with Default Pharmacy**
On the Account Settings page where you manage your credentials, you can now also set a default pharmacy for quicker drug pricing.
- 5. Family View of Healthcare Balances for Subscriber**
The Subscriber's view of the Healthcare Balances page now shows all family members that the Subscriber has access to in a single view, making it easier to see their individual balances along with family members and a family total.
- 6. Spanish Language Support**
The portal is now equipped to handle multi-language support. Spanish is our current offering.
- 7. Online Contact Form**
Members may submit requests for information via an online contact form.
- 8. View ID Card**
Responsive design allows members to access the site from their smart phones. This is especially useful if the member has lost their ID card or prefers to use their phone rather than carry their card with them.
